

The Scottish Rock Garden Club Forrest Medal Highland show, Nairn 2013

Best Plant in the Show Narcissus watieri Shown by Ian & Carole Bainbridge

Note who does the heavy lifting!

Well done to President and Past President Bainbridge. This is their third Forrest Medal but more surprisingly their second Forrest in two weeks, having triumphed last week at Perth. Carole's mum showed and won regularly with *Narcissus rupicola watieri*

'Abaleish'. It was given an RHS award a few years back when shown by I & C B and they named this clone 'Abaleish' - the Berber word for snowflake. After talking to Carole we think that this clone was the same as that shown for many years by the late Shiela Maule from Balerno, who was also a past SRGC President. A super plant which well deserves its award.
