

# 67th

## SEED DISTRIBUTION

---

*Send requests for seeds to:*  
Dr Alan J Hayes,  
31 Liberton Brae,  
Edinburgh,  
EH16 6AG,  
Scotland.

*Send seed donations to:*  
Prof G Stuart Pawley,  
Acres of Keillour,  
Methven,  
Perth, PH1 3RA,  
Scotland.

*Please read page 2 and the notes in the Yearbook*

# The Scottish Rock Garden Club

## 67th Seed Distribution, 2013/14

This year's list has gone wild, both in the garden and in the wild. It is more extensive than any in recent years, with many new donors and new Centurions (sending >100 taxa). Some donors have even apologised for a short list, having experienced poor conditions! You all now have some work to do (more details in the Notes).

### Application

As usual this year, you can apply for seed using the order forms in the centre of the booklet, sending these to Alan Hayes, or you can choose to go online at the SRGC website (see centre page (ii)) to make your booking. The website password is on centre page (i). Even if you send in an order on the paper forms by post, you will be able to pay for seed by credit card online in Sterling, but **not** by debit card. All orders must be received by January 15th. Donors may choose 25 packets, non-donors 16 packets. Please follow the instructions carefully, and write legibly to ensure we pick the items you want. The charge for the main order for **all** members is now £5, €7, or \$10 US. Further information about all payment changes can be found in the Notes. The procedure and cost for surplus seed is detailed on the Surplus order form, centre page (iii).

### Distribution

Distribution of seed starts in January, first for donors' main orders, then for non-donors, and finally for surplus seed applications. We expect main orders to be sent out by 25th January; surplus orders will not be selected or posted until that day, after all main orders have been fulfilled. Your main and surplus orders will therefore arrive some days or weeks apart. We urge US members to send all up-to-date paperwork with the request form – see centre page (i) – unless this was sent with your seed donation.

### Phytosanitary restrictions outwith European Union

As before, US members should not choose any items marked with a black spot<sup>•</sup>. All members outwith the EU are not allowed to be sent 'live material', which means bulbs, bulblets, corms, rice. Such items will be marked ◆ if the donor had made it clear. For their phytosanitary authorities, Australian, New Zealand and US members must write a separate list of items requested which must include the names, as they did last year.

### About the list

Again the RHS Plant Finder<sup>1</sup> is my primary information source for avoiding duplicate entries under different names, and redirecting arrows are used to help those who still use an old name. Species not in the Plant Finder (there is a version on the internet) are checked with the IPNI website<sup>2</sup>, and if not found there or by a wider search (googling) they are marked †. Accuracy in naming cannot be certain, but plants should have been examined by the donors before collecting seed for the Exchange. It should be remembered that named varieties rarely come true, so 'ex' must always be assumed.

After the genus name the sequence is sp., donor's form descriptions, named varieties, then species; the same sequence is used after the species name: forms, varieties and subspecies. Some unknown species are offered as sp., and an entry spp. means that there is a mixture of species of that genus.

The Seed List will soon appear on the website, and will be available for the season, so when your seed packets arrive labelled only with the current list number and you have unfortunately lost this listing, you can identify them in this way.

Botanical families have again been added to the genera with a three-letter code, either the first three letters of the family name, or the code given in the Notes. Genera in the wild section not appearing in the garden section have also got their families identified.

A few entries have been marked ‡, which alerts you to the fact that a specific mention is made in the Notes at the end of the listing.

Stuart Pawley

# WILD COLLECTED SEED

We are indebted to those who take the considerable trouble to collect seed in the wild. Collectors are assigned a number, and the main collection provenances are given. The collector's number will be written on the packet where a choice has been made, giving useful information about your seed.

- 1 Mr Rafael Domínguez; Spain, i: Israel
- 2 Mr R Ratko; Washington, c: Cascade Range,  
g: Columbia Gorge, r: Columbia River  
Basin, w: Wenatchee Mtns.

## Notes

**Changes with subscription payments** Members are now able to join SRGC at a reduced rate, not receiving any printed material, but having immediate web access to the Journal content and all other information. The costs for the Seed Exchange are now removed from the normal subscription and the new E subscription, and are paid for at the time of ordering. This is a change which affects overseas members, and comes into operation this session. There is therefore a much wider choice in membership arrangements. Furthermore this allows us to balance the various costs of the different activities, and be better able to manage the ever-changing and rising costs, such as with printing and postage. This flexibility would not have been a viable option without the on-line payment system, and we trust that members will understand this to be the best way to the future.

**Our Valiant Collectors in the Wild** We must give them hearty thanks for fine contributions from the Tien Shan, the Rockies, the Alps and the Pyrenees. Rafa has been tilting at bulldozers in Spain, but warns that many of his taxa have few seeds, so do not put all your eggs in one basket.

**Not everything manages to get listed** I have been a tad more choosy with the 'sp.' this year, as the main list is so strong. Nothing gets thrown away, so don't be deterred if your 'sp.' didn't show as it could well be used and end at a Show! When there are a number of possibly different 'sp.' I have mixed them; this is good for discipline, as you must never throw away the weaker, smaller, later germinating seedlings whatever you try, but with 'spp.' you will have a variety of growing habits. However, when I get 'sp. dwarf' I wonder how the donor knows it is a dwarf if the actual species is not known, so there should never be such an entry!

**Meconopsis news** The Meconopsis Group have introduced a means of identification through a numbering system, the first three of which are in this list. MGS 1 is *M. baileyi* growing to 1m with small nodding blue flowers, but which may have had some hybridisation. MGS 2 is also *M. baileyi*, somewhat taller and 'cluster-headed', seed of which was on offer last year, SRGC 66, 2539. MGS 3 is considered to be *M. betonicifolia*, a stoloniferous species originating from Yunnan; perhaps what we now have is not 100% pure, but sufficiently distinct to have caused the recent taxonomic decision. As promised in the Journal, seed from *M. 'Keillour Violet'* is included.

**Acer Griseum** Following on from what was written in the summer Journal, we have a good supply of nuts with > 50% viability from the Dutch garden. I failed with about 50 extracted embryos, and none of about 200 nuts I planted out have yet germinated. We know some will, and clearly patience is needed, but maybe the nuts should be abraded somewhat before planting to speed up water penetration.

**Post Haste** Some overseas members send donations with special postal requirements, but this is both unnecessary and counterproductive. They will not arrive more quickly, and if I need to sign for them and am not on hand, they will have to wait another day, and if they get lost you will say 'of no commercial value'.

For UK members using insufficient postage I instruct the postal services to return to sender as quickly as possible, as this is probably the quickest procedure.

**Seed Reception Barber Shop** In comes a huge envelope full of clematis seed heads, and I find myself processing them. Holding by the fine head of hair, which I envy, I cut off the locks and then remove the seeds from the hard core, resulting in seed which the packers can use, and which goes into a packet no more than 10cm x 8cm, just the size I like, unlike the leaky letter-post envelopes which clog my system. I should not be doing this, as I have donations of many packets stuck together to unravel and repair, and many packets to relabel as their labels are invisible, all before I can get down to the business. I understand that fluffy seeds have evolved to counteract the crushing effect of the postal machines, but as these now work with cushions of air you can happily remove as much fluff as possible and cram the seeds into a neat packet.

**When is a Weed, not a Weed?** When it is in the Seed List of course; silly me; why do I ask? And when it has a grand name, like *Taraxacum*, so why not try the dandelion from Mongolia? A donor tells me that the narrow-leaved buttercup, the '*Ranunculus* sp.', is a very pleasing plant in late spring, but who knows what it does for the rest of the year! I've been trying to eradicate a pretty yellow mimulus, but it is very persistent; can't be any on the list as they are not hardy to -15°C. I mustn't go on!

**Families in the list** The three-letter code is either the first three letters of the family, or the code given below.

agp	Agapanthaceae	asl	Asteliaceae	hdc	Hydrocharitaceae	plg	Polygalaceae
agv	Agavaceae	cly	Calycanthaceae	hdp	Hydrophyllaceae	plp	Polypodiaceae
amn	Amaranthaceae	cpp	Capparaceae	pop	Papaveraceae	spt	Sapotaceae

asg	Asparagaceae	elo	Elaeocarpaceae	pdc	Podocarpaceae	stl	Stylidiaceae
apl	Aspleniaceae	elt	Elatinaceae	plm	Polemoniaceae	txd	Taxodiaceae

# Genera by Families

**Acanthaceae** Ruellia

**Aceraceae** Acer

**Actinidiaceae** Actinidia

**Adiantaceae** Trichomanes

**Agapanthaceae** Agapanthus

**Agavaceae** Agave, Beschorneria, Yucca

**Aizoaceae** Aloiopsis, Bergeranthus, Delosperma, Gaudinia, Titanopsis

**Alismataceae** Alisma, Caldesia, Luronium

**Alliaceae** Allium, Bloomeria, Caloscordum, Dichelostemma, Ipheion, Nectaroscordum, Nothoscordum, Tristagma, Tulbaghia

**Alstroemeriaceae** Alstroemeria, Bomarea

**Amaranthaceae** Amaranthus, Ptilotus

**Amaryllidaceae** Acis, Cyrtanthus, Galanthus, Habranthus, Hippeastrelia, Hippeastrum, Lapiedra, Leucojum, Narcissus, Nerine, Pancratium, Phaedranassa, Rhodophiala, Sprekelia, Sternbergia, Zephyranthes

**Apiaceae** Ammi, Angelica, Anisotome, Anthriscus, Apium, Astrantia, Athamanta, Bunium, Bupleurum, Chaerophyllum, Dystaenia, Eryngium, Ferula, Foeniculum, Hacquetia, Hladnikia, Laserpitium, Ligusticum, Lomatium, Meum, Molopospermum, Myrrhis, Naufraga, Odontites, Oenanthe, Oreomyrrhis, Orlaya, Petagnia, Pimpinella, Pleurospermum, Ridolf a, Rouya, Selinum, Seseli, Smyrnium, Thorella, Torilis

**Apocynaceae** Amsonia, Dipladenia, Mandevilla

**Aquifoliaceae** Ilex

**Araceae** Arisaema, Arum, Dracunculus, Eleutherococcus, Lysichiton, Pinellia, Zantedeschia

**Araliaceae** Aralia

**Arecaceae** Phoenix

**Aristolochiaceae** Aristolochia, Asarum, Saruma

**Asclepiadaceae** Asclepias, Ceropegia, Dregea, Gomphocarpus, Periploca, Tweedia, Vincetoxicum

**Asparagaceae** Convallaria, Dipcadi, Galtonia, Maianthemum, Polygonatum, Smilacina

**Asphodelaceae** Anthericum, Arthropodium, Asphodeline, Asphodelus, Bellevalia, Brimeura, Brodiaea, Bulbine, Bulbinella, Camassia, Daubenyia, Eremurus, Eucomis, Hastingsia, Hyacinthella, Hyacinthoides, Kniphof a, Lachenalia, Ledebouria, Massonia, Muscari, Muscarimia, Nolina, Ornithogalum, Paradisea, Puschkinia, Scilla, Simethis, Triteleia, Veltheimia

**Aspleniaceae** Asplenium

**Asteliaceae** Astelia

**Asteraceae** Achillea, Acroclinum, Agoseris, Anacyclus, Anaphalis, Andryala, Antennaria, Anthemis, Argyanthemum, Arnica, Artemisia, Aster, Berkheya, Berlandiera, Brickellia, Cacalia, Cicaliopsis, Calendula, Cancrinia, Carduncellus, Carduus, Carlina, Carthamus, Castroveijoa, Catananche, Celmisia, Centaurea, Chilitrichum, Chrysanthemum, Cicerbita, Cichorium, Cirsium, Cladanthus, Coreopsis, Cosmos, Cremanthodium, Crepis, Cynara, Dahlia, Doronicum, Echinacea, Echinops, Erigeron, Eriophyllum, Eupatorium, Euryops, Evax, Felicia, Gaillardia, Gerbera, Haplopappus, Helenium, Helianthus, Helichrysum, Heterotheca, Hieracium, Hispidella, Hymenostemma, Hymenoxys, Hyoseris, Hypochaeris, Inula, Jurinea, Kalimeris, Lactuca, Lamyropsis, Layia, Leontodon, Leontopodium, Leptinella, Leucanthemopsis, Leucanthemum, Leucogenes, Leuzea, Liatris, Ligularia, Machaeranthera, Mantisalca, Mutisia, Nassauvia, Notobasis, Onopordum, Ozothamnus, Palaecocyanus, Pallenis, Parasenecio, Petasites, Phonus, Picris, Pilosella, Prenanthes, Ptilostemon, Pulicaria, Pyrrocoma, Raoulia, Ratibida, Rudbeckia, Santolina, Saussurea, Scorzonera, Senecio, Serratula, Silybum, Solidago, Staehelina, Stenotus, Stokesia, Syneilesis, Tagetes, Tanacetum, Taraxacum, Tephroses, Tetraneuris, Townsendia, Tragopogon, Vernonia, Wagenitzia, Wyethia, Xerochrysum, Zinnia

**Balsamaceae** Impatiens

**Begoniaceae** Begonia

**Berberidaceae** Berberis, Diphylleia, Jeffersonia, Podophyllum, Ranzania, Sinopodophyllum

**Betulaceae** Betula

**Bignoniaceae** Catalpa, Eccremocarpus, Incarvillea

**Blandfordiaceae** Blandfordia

**Blechnaceae** Woodwardia

**Boraginaceae** Anchusa, Arnebia, Borago, Cerinthe, Cryptantha, Cynoglossum, Echium, Eritrichium, Lithodora, Mertensia, Moltkia, Myosotidium, Myosotis, Nonea, Omphalodes, Onosma, Solenanthus, Symphytum

**Botrychiaceae** Botrychium

**Brassicaceae** Aethionema, Alliaria, Alyssoides, Alyssum, Arabis, Aubrieta, Aurinia, Barbarea, Biscutella, Boleum, Brassica, Braya, Cardamine, Cerastium, Chorispota, Christolea, Cochlearia, Coincya, Coluteocarpus, Coronopus, Crambe,

Degenia, Diplotaxis, Draba, Erucastrum, Erysimum, Fibigia, Hesperis, Iberis, Ionopsidium, Isatis, Lesquerella, Lunaria, Matthiola, Murbeckiella, Notothlaspi, Pachyphragma, Phoenicaulis, Physaria, Ptilotrichum, Raffanaldia, Rhynchosinapis, Schievreckia, Sisymbrium, Smelowskia, Thlaspi

**Bromeliaceae** Puya

**Buxaceae** Sarcococca

**Cactaceae** Austrocactus, Echinocereus, Lobivia, Maihuenia, Opuntia, Rebutia

**Caesalpinaceae** Senna

**Calceolariaceae** Calceolaria

**Calycanthaceae** Chimonanthus

**Campanulaceae** Adenophora, Asyneuma, Azorina, Campanula, Canarina, Codonopsis, Cyananthus, Edraianthus, Isotoma, Jasione, Lobelia, Michauxia, Physoplexis, Phyteuma, Platycodon, Pratia, Symphyandra, Wahlenbergia

**Cannaceae** Canna

**Capparaceae** Cleome

**Caprifoliaceae** Capparis, Kolkwitzia, Lonicera, Triosteum, Viburnum

**Caryophyllaceae** Agrostemma, Arenaria, Cerastium, Colobanthus, Dianthus, Gypsophila, Lychnis, Minuartia, Moehringia, Petrocoptis, Petrorhagia, Saponaria, Silene

**Celastraceae** Euonymus, Parnassia

**Chenopodiaceae** Atriplex, Bassia, Cremnophyton, Salicornia

**Cistaceae** Cistus, Halimium, Helianthemum, Tuberaria

**Clusiaceae** Hypericum

**Colchicaceae** Androcymbium, Colchicum, Disporum, Gloriosa, Merendera, Sandersonia

**Commelinaceae** Commelina, Pollia, Tinantia

**Convolvulaceae** Calystegia, Convolvulus, Ipomoea

**Cornaceae** Cornus

**Crassulaceae** Aeonium, Chiastophyllum, Cotyledon, Jovibarba, Rhodiola, Rosularia, Sedum, Sempervivum, Umbilicus

**Cucurbitaceae** Bryonia, Herpetospermum

**Cupressaceae** Cupressus

**Cyperaceae** Carex, Eleocharis, Uncinia

**Daphniphyllaceae** Daphniphyllum

**Dicksoniaceae** Culcita

**Dilleniaceae** Hibbertia

**Dioscoreaceae** Borderea, Dioscorea

**Dipsacaceae** Cephalaria, Dipsacus, Knautia, Lomelosia, Pterocephalus, Scabiosa, Succisa

**Dracaenaceae** Dracaena

**Droseraceae** Aldrovandra, Drosera

**Dryopteridaceae** Dryopteris

**Elaeagnaceae** Hippophae

**Elaeocarpaceae** Crinodendron, Velleia

**Elatinaceae** Elatine

**Empetraceae** Empetrum

**Epacridaceae** Leptecophylla, Leucopogon, Trochocarpa

**Ephedraceae** Ephedra

**Ericaceae** Arctostaphylos, Cassiope, Enkianthus, Epigaea, Erica, Gaultheria, Kalmia, Loiseleuria, Menziesia, Moneses, Phyllodoce, Pieris, Pyrola, Rhododendron, Rhodothamnus, Vaccinium

**Euphorbiaceae** Euphorbia

**Flacourtiaceae** Berberidopsis

**Gentianaceae** Blackstonia, Centaurium, Gentiana, Gentianella, Swertia

**Geraniaceae** Erodium, Geranium, Monsonia, Pelargonium

**Gesneriaceae** Briggsia, Chirita, Jankaea, Ramonda, Sinningia, Streptocarpus

**Globulariaceae** Globularia

**Goodeniaceae** Brunonia

**Grossulariaceae** Ribes

**Hemerocallidaceae** Hemerocallis

**Hippuridaceae** Hippuris

**Hostaceae** Hosta

**Hyacinthaceae** Albuca, Chionodoxa, Leopoldia, Polyxena, Urginea

**Hydrangeaceae** Deinanthe, Hydrangea, Kirengeshoma, Nemophila, Philadelphus, Platycrater

**Hydrocharitaceae** Najas

**Hydrophyllaceae** Hydrophyllum, Phacelia, Romanzoff a

**Hypoxidaceae** Hypoxis, Rhodohypoxis

**Illecebraceae** Herniaria, Scleranthus

**Iridaceae** Aristeia, Babiana, Crocosmia, Crocus, Cypella, Dierama, Diplarrena, Freesia, Geissorhiza, Gelasine, Gladiolus, Herbertia, Hesperantha, Hexaglottis, Homeria, Iris, Isophysis, Lapeirousia, Libertia, Melasphaerula, Moraea, Neomarica, Olsynium, Orthrosanthus, Patersonia, Romulea, Sisyrinchium, Solenomelus, Sparaxis, Tigridia, Watsonia

**Isoëtaceae** Isoetes

**Ixioliriaceae** Ixiolirion

**Juncaceae** Juncus, Luzula

**Lamiaceae** Agastache, Ajuga, Ballota, Dracocephalum, Elsholtzia, Eremostachys, Galeopsis, Horminum, Lagopsis, Lamium, Lavandula, Leonurus, Lepchinia, Marrubium, Melittis, Mentha, Micromeria, Monarda, Monardella, Nardostachys, Nepeta, Origanum, Phlomis, Phlomoides, Physostegia, Prostanthera, Prunella, Rosmarinus, Salvia, Satureja, Scutellaria, Sideritis, Stachys, Teucrium, Thymus

**Lardizabalaceae** Akebia

**Lauraceae** Lindera

**Lentibulariaceae** Pinguicula

**Liliaceae** Calochortus, Cardocrinum, Clintonia, Drymophila, Erythronium, Fritillaria, Lilium, Nomocharis, Notholirion, Prosartes, Streptopus, Tricyrtis, Tulipa

**Limnanthaceae** Limnanthes

**Linaceae** Linum

**Loasaceae** Loasa

**Lythraceae** Cuphea, Lythrum

**Magnoliaceae** Magnolia, Michelia

**Malvaceae** Abutilon, Alcea, Althaea, Alyogyne, Anoda, Callirhoe, Hibiscus, Hoheria, Kitaibela, Kosteletskya, Lavatera, Malva, Napaea, Pavonia, Sidalcea, Sphaeralcea

**Marsileaceae** Marsilea

**Melanthiaceae** Brachyotum, Heloniopsis, Tofieldia, Veratrum, Ypsilandra, Zigadenus

**Menyanthaceae** Menyanthes

**Mimosaceae** Acacia, Albizia, Paraserianthes

**Morinaceae** Morina

**Myrtaceae** Callistemon, Eucalyptus, Leptospermum, Myrtus

**Nolanaceae** Nolana

**Nyctaginaceae** Mirabilis

**Oleaceae** Fraxinus, Syringa

**Onagraceae** Calylophus, Chamerion, Circaea, Clarkia, Epilobium, Fuchsia, Kneiffia, Oenothera, Zauschneria

**Ophioglossaceae** Ophioglossum

**Orchidaceae** Anacamptis, Bletilla, Calypso, Cephalanthera, Cyrtopodium, Dactylorhiza, Epipactis, Gymnigritella, Himantoglossum, Liparis, Ophrys, Orchis, Platanthera, Pleione, Spiranthes

**Orobanchaceae** Castilleja, Orobanche, Rhinanthus

**Oxalidaceae** Oxalis

**Paeoniaceae** Paeonia

**Papaveraceae** Adlumia, Argemone, Capnoides, Corydalis, Dactylicapnos, Dicentra, Eschscholzia, Glaucium, Hunnemannia, Hylomecon, Lamprocapnos, Macleaya, Meconopsis, Papaver, Romneya, Rupicapnos, Sanguinaria, Stylophorum

**Papilionaceae** Amorpha, Anthyllis, Astragalus, Baptisia, Caragana, Colutea, Coronilla, Crotalaria, Cytisus, Dalea, Dunbaria, Ebenus, Galega, Genista, Glycyrrhiza, Hardenbergia, Hedsarum, Indigofera, Kennedia, Laburnum, Lathyrus, Lotus, Lupinus, Melilotus, Ononis, Oxytropis, Petteria, Piptanthus, Retama, Tetragonolobus, Thermopsis, Trifolium, Vicia

**Phrymaceae** Mimulus

**Phytolaccaceae** Phytolacca

**Pinaceae** Abies

**Pittosporaceae** Billardiera

**Plantaginaceae** Antirrhinum, Asarina, Chaenorhinum, Chelone, Digitalis, Erinus, Hebe, Linaria, Lophospermum, Maurandya, Ourisia, Paederota, Penstemon, Plantago, Rehmannia, Synthyris, Veronica, Veronicastrum, Wulfenia

**Plumbaginaceae** Acantholimon, Armeria, Limonium

**Poaceae** Arctagrostis, Arctophila, Avenula, Briza, Bromus, Calamagrostis, Chionochloa, Cinna, Coleanthus, Cynodon, Deschampsia, Elymus, Festuca, Helictotrichon, Holcus, Hystrix, Micropyropsis, Milium, Pennisetum, Phaeosperma, Poa, Polypogon, Pseudarrhenatherum, Puccinellia, Stipa, Trisetum

**Podocarpaceae** Microcachrys

**Polemoniaceae** Collomia, Gilia, Ipomopsis, Polemonium

**Polygalaceae** Polygala

**Polygonaceae** Eriogonum, Koenigia, Muehlenbeckia, Oxyria, Persicaria, Polygonum, Rheum, Rumex

**Polypodiaceae** Polypodium

**Portulacaceae** Anacampteros, Calandrinia, Claytonia, Lewisia, Phemeranthus, Talinum

**Primulaceae** Anagallis, Androsace, Coris, Cortusa, Cyclamen, Dionysia, Dodecatheon, Omphalogramma, Primula, Soldanella, Vitaliana

**Proteaceae** Bellendenia, Embotrium

**Ranunculaceae** Aconitum, Actaea, Adonis, Anemone, Anemonella, Anemonopsis, Aquilegia, Beesia, Callianthemum, Caltha, Cimicifuga, Clematis, Consolida, Coptis, Delphinium, Eranthis, Glaucidium, Helleborus, Hepatica, Isopyrum, Nigella, Paraquilegia, Pulsatilla, Ranunculus, Semiaquilegia, Thalictrum, Trollius

**Resedaceae** Reseda

**Rhamnaceae** Frangula

**Rosaceae** Acaena, Agrimonia, Amelanchier, Aruncus, Chaenomeles, Comarum, Cotoneaster, Crataegus, Dryas, Duchesnea, Exochorda, Geum, Gillenia, Horkelia, Petrophytum, Polyplepsis, Potentilla, Prinsepia, Pyrus, Rhodotypos, Rosa, Rubus, Sanguisorba, Sibbaldia, Sieversia, Sorbus, Spiraea

**Rubiaceae** Asperula, Galium, Houstonia, Mitchella, Phuopsis, Putoria

**Rutaceae** Dictamnus, Ruta

**Salicaceae** Salix

**Santalaceae** Thesium

**Sapindaceae** Koelreuteria

**Sapotaceae** Sideroxylon

**Sarraceniaceae** Sarracenia

**Saxifragaceae** Astilbe, Boykinia, Darmera, Elmera, Francoa, Heuchera, Leptarrhena, Micranthes, Mitella, Peltoboykinia, Rodgersia, Saxifraga, Tellima

**Scrophulariaceae** Bartsia, Besseyia, Collinsia, Euphrasia, Lindernia, Macrosyringion, Nemesia, Orthocarpus, Pedicularis, Phygellus, Scrophularia, Tozzia, Verbascum

**Solanaceae** Atropa, Mandragora, Nicandra, Nicotiana, Physochlaina, Schizanthus, Scopolia, Solanum

**Staphyleaceae** Staphylea

**Strelitziaceae** Styrox

**Stylidiaceae** Stylidium

**Styracaceae** Sinojackia

**Taxaceae** Taxus

**Taxodiaceae** Sequoiadendron

**Tecophilaeaceae** Conanthera, Tecophilaea

**Thymelaeaceae** Daphne, Pimelea, Thymelaea

**Trilliaceae** Paris, Trillium

**Tropaeolaceae** Tropaeolum

**Ulmaceae** Zelkova

**Valerianaceae** Centranthus, Patrinia, Valeriana

**Velloziaceae** Talbotia

**Verbenaceae** Callicarpa, Junellia, Verbena

**Violaceae** Viola

**Woodsiaceae** Athyrium, Cystopteris, Diplazium, Gymnocarpium, Woodsia

**Zingiberaceae** Hedychium, Roscoea
