

68 th

SEED DISTRIBUTION

The 68th Seed Exchange of the Scottish Rock Garden Club is closed.

This list is online for reference only

The Scottish Rock Garden Club

68th Seed Distribution, 2014/15

There is a change in the Exchange team this year, as Distribution is moving to the South-West Group, so you must make sure you send your requests to Neil McNulty, whose name and address are on the title page. You must be sure to do this, as the previous encumbant may be on a long world cruise!

Application

The procedure for seed requests will be as usual, using the order forms in the centre of the booklet, sending these to Neil, or you can choose to go online at the SRGC website (see centre page (ii)) to make your booking. The website password is on centre page (i). Even if you send in an order on the paper forms by post, you will be able to pay for seed by credit card online in Sterling, but **not** by debit card. All orders must be received by January 15th. Donors may choose 25 packets, non-donors 16 packets. Please follow the instructions carefully, and write legibly to ensure we pick the items you want. The charge for the main order for **all** members is now £5, €7, or \$10 US. The procedure and cost for surplus seed is detailed on the Surplus order form, page (iii).

Distribution

Distribution of seed starts in January, first for donors' main orders, then for non-donors', and finally for surplus seed applications. We expect main orders to be sent out in January, but surplus orders will be processed only after all main orders have been fulfilled. Your main and surplus orders will therefore arrive some time apart. We urge US members to send all paperwork with the request form – see centre page (i) – unless this was sent with your seed donation.

Phytosanitary restrictions outwith European Union

As before, US members should not choose any items marked with a black spot •. All members outwith the EU are not allowed to be sent 'live material', which means bulbs, bulblets, corms, rice. Such items will be marked • in the list if the donor had made it clear. For their phytosanitary authorities, Australian, New Zealand and US members must write a separate list of items requested which must include the names, as year.

About the list

Again the RHS Plant Finder¹ is my primary information source for avoiding duplicate entries under different names, and redirecting arrows are used to help those who still use an old name. Species not in the Plant Finder (there is a version on the internet) are checked with the IPNI website² or the Plant List website³, and if not found there or by a wider search (googling) they are marked †. Accuracy in naming cannot be certain, but plants should have been examined by the donors before collecting seed for the Exchange. It should be remembered that named varieties rarely come true, so 'ex' must always be assumed.

After the genus name the sequence is sp., donor's form descriptions, named varieties, then species; the same sequence is used after the species name – forms, varieties and subspecies. Some unknown species are offered as sp., and an entry spp. means that there is a mixture of species of that genus.

The Seed List will soon appear on the website, and will be available for the season, so when your seed packets arrive labelled only with the current list number and you have unfortunately lost this listing, you can identify them in this way.

Botanical families have again been added to the genera with a three-letter code, either the first three letters of the family name, or the code given in the Notes. Genera in the wild section not appearing in the garden section have also got their families identified.

A few entries have been marked ‡, which alerts you to the fact that a specific mention is made in the Notes at the end of the listing.

Stuart Pawley

WILD COLLECTED SEED

We are indebted to those who take the considerable trouble to collect seed in the wild. Collectors are assigned a number, and the main collection provenances are given. The collector's number will be written on the packet where a choice has been made, giving useful information about your seed.

Notes

Three buses in a row for Chelsea 2014 Sometimes it is necessary to go on the web to search for the variety names which come in. It was a surprise this year to find three taxa one after the other. *Clematis* 'Alaina', 'Countess of Wessex' and 'Zara' were all introductions new in Chelsea this year. Evidently they grew apace.

Meconopsis news True *Meconopsis napaulensis* appears at last, a rare opportunity to establish the true form of this species, so we must grow where cross-pollination with the hybrid cannot take place; in the list the use of 'hort.', 'misapplied' or 'of gardens' is avoided as it is never crystal clear what these terms might mean.

Meconopsis musical chairs involves an extra chair when the music stops; see all about it using the little arrows!

The wild collected *M. grandis* is described as an enigma, with seed more like *M. baileyi* but with a distinctly *grandis* efflorescence. Do we call it 'Raise a Laugh'?

Can clones live for ever? *M.* 'Jimmy Bayne', a firm favourite, now gives very little seed, but plenty for an experiment. Ten seedlings grew well with no variation, performing like 'Jimmy Bayne' on steroids, giving about 20,000 seeds, a bonanza on offer this year – a productivity jump of botanical importance. Now please let me know of any success, using the name 'Jim's Ex' so as not to undermine the good work of the Meconopsis Group.

A purple *M. grandis* figured in the last three lists respectively as #2675, #2554, and #2807(aff.) & #2808(cf.), the 'aff.' being changed to 'cf.' but both entries survived, the change being made as there is no compelling reason to assume that the plant is not *M. grandis*. Seed originally came from Tromsø Botanic Gardens, and we should give it a name to avoid confusion with others.

A Saxifrage Chance Seedling In section *Saxifraga*, 'April Blush' was a chance hybrid many years ago somewhere in Forfar, and is still going strong and true from seed. Flowers are like a pink 'Mossy', fading to white before aestivating — our very own saxifrage! Perhaps the name was 'Avril Blush'.

Vireya Rhododendrons for Scotland's Riviera We have an extensive collection this year of these rather special rhododendrons, that sadly would not survive Perthshire. #3474 did not seem to have a name, but the names below this entry can all be found on the web. The donation also included the taxa involving *R. hellwigii* and *R. lochiaie*, which are presumably also not hardy enough for North Britain.

Crosses with *Primula maximowiczii* Failing to sustain *Primula handeliana* and *Primula tangutica* in the garden, I crossed my last plant of each with *Primula maximowiczii*, and they have grown magnificently. On offer is first generation seed, though not as much as I was expecting as the roe deer took a special fancy to the seed heads of *P. t.* × *m.* (see p4 of this summer's Journal). Colour variation should be very interesting with the second generation. Surprisingly I failed to cross these two crosses, so if anyone tries this and succeeds, please let me know. I was planning to call it *P. maximowiczii* 'Furious'.

Turnups needed for ladies trousers (see #5351) An expert collector from the wild, well known to Club members, says with a little smile that it is surprising what can get lodged in your turnups! The collector of *Pulsatilla patens flavescens* in the Novosibirsk region of Russia and of *Pulsatilla patens multifida* in Karkali, Kazakhstan, was obliged to put the collected seed together in one packet, due to an incorrect phytosanitary document; did she have turnups on her trousers? However, recipients of the seed will have no problems, as any violet flowers will be from Kazakhstan, yellow flowers from Russia with luck.

Acer griseum There is a good supply of nuts this year, expected to have a viability rate of nearly 50%. If they have dried and hardened by the time you get them, it might be a good idea to abrade the nut surface before sowing. Patience is needed as seedlings may not appear for over a twelve-month.

From the Barber to the Delicatessen Last year was shaving the locks of the clematis in my barber's shop, now it is the turn of the delicatessen. Putting a huge packet of fluff into the food processor for half a minute had a modicum of success, with quite a number of undamaged seeds at the bottom of the machine, but this is a rather inefficient and ineffective way of rendering the contribution manageable. Any suggestions where next?

Families in the list The three-letter code used in the list is either the first three letters of the family, or the code given with the family name on page 36. The asterisks show the splitting of what was *Liliaceae*. A list of the genera for each family will appear on the .pdf file on the web, as pages 37 and 38.

Aizoaceae Delosperma, Lithops

Alliaceae Allium, Bloembergenia, Caloscordum, Dichelostemma, Ipeion, Nectaroscordum, Tristagma, Tulbaghia

Alstroemeriaceae Alstroemeria, Bomarea

Amaranthaceae Amaranthus, Gomphrena

Amaryllidaceae Acis, Clivia, Cyrtanthus, Galanthus, Habranthus, Hippeastrum, Leucojum, Narcissus, Nerine, Rhodophiala, Spiloxene, Sternbergia, Zephyranthes

Apiaceae Ammi, Angelica, Anthriscus, Astrantia, Bupleurum, Centella, Chaerophyllum, Cryptotaenia, Dystaenia, Eryngium, Ferula, Foeniculum, Hacquetia, Laserpitium, Ligusticum, Lomatium, Meum, Myrrhis, Oreomyrrhis, Orlaya, Peucedanum, Pimpinella, Pleurospermum, Selinum, Seseli, Smyrniacum

Apocynaceae Amsonia

Aquifoliaceae Ilex

Araceae Arisaema, Arum, Eleutherococcus, Eminium, Pinellia, Sauromatum

Araliaceae Aralia

Aristolochiaceae Aristolochia, Saruma

Asclepiadaceae Asclepias, Ceropogia, Gomphocarpus, Periploca, Tweedia, Vincetoxicum

Asparagaceae Albuca, Chionodoxa, Chionoscilla, Convallaria, Dipsadi, Galtonia, Maianthemum, Ophiopogon, Polygonatum, Polyxena, Tripladenia

Asphodelaceae Anthericum, Arthropodium, Asphodeline, Asphodelus, Bellevalia, Brimeura, Brodiaea, Bulbine, Bulbinella, Camassia, Daubnya, Drimia, Eremurus, Eucomis, Hastingsia, Hyacinthella, Hyacinthoides, Hyacinthus, Kniphofia, Lachenalia, Massonia, Merwillia, Muscari, Ornithogalum, Paradisaea, Puschkinia, Scilla, Tritoleia, Veltheimia

Aspleniaceae Asplenium

Asteraceae Achillea, Adenostyles, Amberboa, Anaphalis, Andryala, Antennaria, Anthemis, Arnica, Artemisia, Aster, Berkheya, Berlandiera, Buphthalmum, Cacalia, Carduus, Carlina, Catananche, Celmisia, Centaurea, Chrysanthemum, Chrysopsis, Cicerbita, Cirsium, Coreopsis, Cosmos, Cotula, Craspedia, Cremanthodium, Crepis, Dahlia, Doronicum, Echinacea, Echinops, Emilia, End@of@garden@file, Erigeron, Eriophyllum, Eupatorium, Euryops, Felicia, Gaillardia, Gazania, Gerbera, Helenium, Helianthus, Helichrysum, Heterotheca, Hieracium, Hymenoxys, Inula, Kalimeris, Lactuca, Layia, Leontopodium, Leucogenes, Liatris, Ligularia, Mantisalca, Marshallia, Melampodium, Mutisia, Nassauvia, Oncosiphon, Onopordum, Ozothamnus, Pachystegia, Pilosella, Ptilostemon, Pulicaria, Pyrethrum, Raoulia, Ratibida, Rudbeckia, Santolina, Saussurea, Senecio, Serratula, Silphium, Silybum, Solidago, Symphyotrichum, Syneilesis, Tagetes, Tanacetum, Taraxacum, Tetraneuris, Townsendia, Tragopogon, Ursinia, Vernonia, Wyethia, Xerochrysum, Zinnia

Balsamaceae Impatiens

Begoniaceae Begonia

Berberidaceae Achlys, Berberis, Bongardia, Caulophyllum, Diphylleia, Jeffersonia, Mahonia, Podophyllum, Ranzania, Sinopodophyllum, Vancouveria

Betulaceae Alnus, Betula

Bignoniaceae Catalpa, Eccremocarpus, Incarvillea, Jacaranda, Pandorea, Podranea

Blandfordiaceae Blandfordia

Boraginaceae Anchusa, Arnebia, Cerinthe, Cynoglossum, Echium, Eritrichium, Hesperochiron, Hydrophyllum, Lithospermum, Mertensia, Moltkia, Myosotidium, Myosotis, Nemophila, Omphalodes, Onosma, Paracaryum, Phacelia, Symphytum

Brassicaceae Aethionema, Alyssoides, Alyssum, Arabis, Aubrieta, Aurinia, Barbarea, Brassica, Cardamine, Cusickiella, Degenia, Draba, Erysimum, Fibigia, Hesperis, Iberis, Lunaria, Matthiola, Megacarpaea, Physaria, Raffanaldia, Schievereckia, Tchihatchewia, Thlaspi, Turrilis

Bromeliaceae Puya

Buddlejaceae Buddleja

Butomaceae Butomus

Cactaceae Echinopsis, Opuntia, Rebutia

Caesalpiniaceae Cercis

Calceolariaceae Calceolaria

Campanulaceae Adenophora, Asyneuma, Azorina, Campanula, Codonopsis, Cyananthus, Edraianthus, Jasione, Lobelia, Michauxia, Physoplexis, Phyteuma, Platycodon, Symphyandra, Wahlenbergia

Cannaceae Canna

Caprifoliaceae Kolkwitzia, Lonicera, Triosteum, Viburnum

Caryophyllaceae Agrostemma, Arenaria, Cerastium, Dianthus, Drypis, Gypsophila, Lychnis, Minuartia, Petrocoptis, Petrorrhagia, Saponaria, Silene, Spergularia

Casuarinaceae Allocasuarina

Celastraceae Euonymus, Parnassia

Chenopodiaceae Atriplex

Cistaceae Cistus, Helianthemum, Tuberaria

Cleomaceae Cleome

Clethraceae Clethra

Clusiaceae Hypericum

Colchicaceae Androcymbium, Baeometra, Colchicum, Disporum, Littonia, Merendera, Wurmbea

Commelinaceae Commelina, Polia, Tinantia, Tradescantia

Convolvulaceae Ipomoea

Cornaceae Cornus

Crassulaceae Chastophyllum, Cotyledon, Echeveria, Hylotelephium, Jovibarba, Orostachys, Rhodiola, Rosularia, Sedum, Sempervivum

Cupressaceae Cupressus

Cyperaceae Carex, Uncinia

Diapensiaceae Shortia

Dioscoreaceae Dioscorea

Dipsacaceae Cephalaria, Dipsacus, Knautia, Pteroccephalus, Scabiosa, Succisa

Droseraceae Drosera, Drosophyllum

Dryopteridaceae Polystichum

Elaeocarpaceae Aristotelia, Crinodendron

Epacridaceae Astroloma, Richea, Trochocarpa

Ericaceae Arbutus, Daboecia, Dimorphantha, Enkianthus, Gaultheria, Kalmia, Phyllodoce, Pieris, Rhododendron, Tripetaleia, Vaccinium

Euphorbiaceae Euphorbia

Gentianaceae Centaurium, Gentiana, Swertia

Geraniaceae Erodium, Geranium, Pelargonium

Gesneriaceae Chirita, Haberlea, Lysionotus, Ramonda, Sinningia, Streptocarpus

Globulariaceae Globularia

Grossulariaceae Ribes

Gunneraceae Gunnera

Haemodoraceae Anigozanthos

Hamamelidaceae Hamamelis

Hemerocallidaceae Dianella, Hemerocallis, Pasithea, Phormium

Hostaceae Hosta

Hydrangeaceae Carpenteria, Deinanthe, Hydrangea, Philadelphus, Platycrater

Hypoxidaceae Rhodohypoxis

Illecebraceae Scleranthus

Iridaceae Aristeia, Babiana, Calydorea, Crocosmia, Crocus, Cypella, Dierama, Dietes, Diplarrena, Ferraria, Freesia, Geissorhiza, Gelasine, Gladiolus, Herbertia, Hesperantha, Homeria, Iris, Ixia, Lapeirusia, Libertia, Moraea, Olsynium, Onira, Orthrosanthus, Romulea, Sisyrinchium, Solenomelus, Sparaxis, Tigridia, Watsonia

Ixioliriaceae Ixiolirion

Juncaceae Luzula

Lamiaceae Acinos, Agastache, Ajuga, Ballota, Clinopodium, Dracocephalum, Eremostachys, Horminum, Hyssopus, Lallelantia, Lavandula, Leonurus, Lepechinia, Marrubium, Melittis, Mentha, Moluccella, Monarda, Monardella, Nepeta, Ocimum, Origanum, Phlomis, Prunella, Rosmarinus, Salvia, Satureja, Scutellaria, Sideritis, Solenostemon, Stachys, Teucrium

Lardizabalaceae Akebia, Decaisnea, Lardizabala

Lentibulariaceae Pinguicula

Liliaceae Calochortus, Cardiocrinum, Clintonia, Erythronium, Fritillaria, Gagea, Helonias, Lilium, Nomocharis, Notholirion, Tricyrtis, Tulipa, Zoellnerallium

Linaceae Linum

Loasaceae Caiophora, Loasa

Lythraceae Lythrum

Magnoliaceae Magnolia

Malvaceae Alcea, Althaea, Callirhoe, Hermannia, Hibiscus, Kitaibela, Lavatera, Malva, Napaea, Sidalcea, Sphaeralcea

Melanthiaceae Tofieldia, Toona, Veratrum, Zigadenus

Mimosaceae Acacia

Morinaceae Morina

Myrtaceae Callistemon, Eucalyptus, Leptospermum, Melaleuca, Myrtus

Nyctaginaceae Mirabilis

Onagraceae Chamerion, Clarkia, Epilobium, Fuchsia, Gaura, Oenothera, Zauschneria

Orchidaceae Bletilla, Dactylorhiza, Epipactis, Himantoglossum, Ophrys, Orchis, Pleione

Orobanchaceae Castilleja, Orobanche

Oxalidaceae Oxalis

Paeoniaceae Paeonia

Papaveraceae Argemone, Capnoides, Cathcartia, Chelidonium, Corydalis, Dicentra, Eschscholzia, Glaucium, Hunnemannia, Hylomecon, Lamprocapnos, Macleaya, Meconopsis, Papaver, Parameconopsis, Romneya, Sanguinaria, Sarcocapnos, Stylophorum

Papilionaceae Anthyllis, Astragalus, Baptisia, Clianthus, Clitoria, Colutea, Crotalaria, Cytisus, Dalea, Galega, Genista, Hedysarum, Hippocrepis, Lathyrus, Lotus, Lupinus, Medicago, Oxytropis, Parochetus, Sophora, Spartium, Thermopsis, Trifolium, Vicia

Passifloraceae Passiflora

Philesiaceae Lapageria

Phrymaceae Mimulus, Phryma

Pinaceae Abies, Pinus

Pittosporaceae Billardiera

Plantaginaceae Antirrhinum, Asarina, Chaenorhinum, Chelone, Digitalis, Erinus, Hebe, Linaria, Lophospermum, Ourisia, Parahebe, Penstemon, Plantago, Rehmannia, Synthyris, Veronica, Veronicastrum, Wulfenia

Plumbaginaceae Acantholimon, Armeria, Bukiniczia, Goniolimon, Limonium

Poaceae Anemanthele, Aristida, Briza, Chasmanthium, Chionochloa, Cynodon, Elymus, Hakonechloa, Pennisetum, Phaenosperma, Polypogon, Sporobolus, Stipa

Polemoniaceae Collomia, Gilia, Ipomopsis, Polemonium

Polygonaceae Eriogonum, Persicaria, Polygonum, Rheum, Rumex

Portulacaceae Calandrinia, Cistanche, Lewisia, Phemeranthus, Talinum

Primulaceae Anagallis, Androsace, Cortusa, Cyclamen, Dionysia, Dodecatheon, Lysimachia, Primula, Soldanella

Proteaceae Bellendena, Leucadendron, Telopea

Ranunculaceae Aconitum, Actaea, Adonis, Anemone, Anemonella, Anemonopsis, Aquilegia, Beesia, Callianthemum, Caltha, Cimicifuga, Clematis, Consolida, Delphinium, Eranthis, Glaucidium, Helleborus, Hepatica, Nigella, Paraquilegia, Pulsatilla, Ranunculus, Semiaquilegia, Thalictrum, Trautvetteria, Trollius

Resedaceae Reseda

Rosaceae Acaena, Alchemilla, Aruncus, Cotoneaster, Dryas, Duchesnea, Exochorda, Filipendula, Fragaria, Geum, Gillenia, Petrophytum, Polylophus, Potentilla, Prunus, Rhodotypos, Rosa, Sanguisorba, Sieversia, Sorbus

Rubiaceae Asperula, Galium, Phuopsis

Rutaceae Dictamnus, Poncirus, Ptelea, Ruta, Zanthoxylum

Sarraceniaceae Sarracenia

Saxifragaceae Astilboides, Boykinia, Darmera, Elmera, Francoa, Heuchera, Mitella, Peltoboykinia, Saxifraga, Tellima

Schisandraceae Schisandra

Scrophulariaceae Besseyia, Collinsia, Pedicularis, Pseudolysimachion, Verbascum

Solanaceae Hyoscyamus, Lycium, Mandragora, Nicandra, Nicotiana, Petunia, Physoclaina, Schizanthus, Solanum, Vestia

Stachyuraceae Stachyurus

Stackhousiaceae Stackhousia

Strelitziaceae Styra

Stylidiaceae Stylidium

Styracaceae Sinojackia

Taxodiaceae Sequoiadendron

Tecophilaeaceae Conanthera, Tecophilaea

Theaceae Stewartia

Thymelaeaceae Daphne

Trilliaceae Paris, Trillium

Tropaeolaceae Tropaeolum

Urticaceae Boehmeria

Valerianaceae Centranthus, Patrinia

Verbenaceae Clerodendrum, Verbena

Violaceae Viola

Winteraceae Drimys

Woodsiaceae Gymnocarpium

Zingiberaceae Cautleya, Hedychium, Roscoea
