

SCOTTISH ROCK GARDEN CLUB

69th SEED DISTRIBUTION

2015-2016

Send requests for seed to:

Mr Neil McNulty
6 Main Road
Crookedholm
Kilmarnock
KA3 6JT
Scotland

Send seed donations to:

Drs Ian and Carole Bainbridge
Luckie Harg's
Anwoth Road
Gatehouse of Fleet
Castle Douglas
DG7 2EF
Scotland

Contact us at seed@srgc.org.uk
Please read page 2 and the notes in the Yearbook

Scottish Rock Garden Club 69th Seed Distribution 2015-16

Applications

- The procedure for seed requests is as usual: use the forms in the centre of the booklet, and send these to Neil McNulty, or go online at the SRGC website (see centrefold page ii) to make your requests.
- The website password is on centrefold page (i).
- Even if you request seed on the paper forms by post, you can pay for seed by credit card online in Sterling, but not by debit card.
- All seed requests must be received by January 15th.
- Donors may choose 25 packets, non-donors 16 packets.
- Please follow the instructions carefully, and write legibly to ensure we pick the items you want.
- The charge for the main request for all members is now £5, €7, or \$10 US, to cover packing, postage and administration of the exchange.

Distribution

- Distribution of seed starts in January, first for donors' main requests, then for non-donors', and finally for surplus seed applications.
- Main requests will be sent out in January, but surplus requests will be processed only after all main orders have been fulfilled. Main and surplus requests will therefore arrive some time apart.
- US members must send all their necessary paperwork with the request form (see centrefold page i) unless this was sent with your seed donation.

Phytosanitary restrictions outwith European Union

- US members should not choose any items marked with a black star ★.
- We cannot send live material to members outwith the EU. All bulbs, bulblets, corms and rice are marked ♠ in the list.
- Australian, New Zealand and US members must write a separate list of items requested which must include both numbers and names.

About the list

- The Plant List and the RHS Find a Plant website are our primary sources of information for verifying plant names, and redirecting arrows are used to help those who still use an old name. Species not in the Plant List or RHS website are checked with the IPNI website, and then a Google search.
- Some genera are 'sunk' in this list. For *Douglasia*, look at *Androsace*; for *Cortusa*, go to *Primula*, for *Symphyandra*, look at *Campanula*. On the contrary, *Dodecatheon* and *Meconopsis* are unchanged.
- We cannot guarantee accuracy in naming, we rely on the donors naming of seed for the Exchange. Remember that named varieties rarely come true, so any named variety should really be considered as 'ex' that variety.
- After the genus name the sequence is sp., named varieties, then species; and after the species name subspecies, varieties and forms. Some unknown species are offered as sp., and an entry spp. means that there is a mixture of species of that genus.
- The Seed List will remain on the SRGC website, so you will be able to check packet numbers in the future.
- Botanical families have been added to the genera with a three-letter code, either the first three letters of the family name, or the code given in the Notes on p36. Genera in the wild section also have their families identified.

WILD COLLECTED SEED

- We are indebted to those members who take the considerable trouble to collect seed in the wild.
- Collectors are assigned a number which is written on the donated packet, and you may add this number to the seed number if you wish to receive seed from a particular collector.
- Collectors' numbers are included in the following listing when requested.
- Details of some collection sites may be available on request from Ian and Carole Bainbridge at seed@srgc.org.uk

1	Hamish Brown	30	Roland Sibottier
2	Kenton Seth	31	Lori Skulski

Notes

Mistakes, mistakes

We're sure that in our first year of compiling the list we have made more than our fair share of mistakes. Please do let us know where there are silly errors; we will be working on rectifying some of them at least over the next year. Among these we will be aiming to get good, sensible definitive names for Cyclamen, Muscari and Paeonia.....

Supplementary list

One consequence of learning the ropes is that we have decided to add a short supplementary list this year. This is found at the end of the garden seed list, and it comprises unexpected late arrivals, plus items which were inadvertently missed from the main list. We hope you enjoy them all!

Naming of plants

Finding the definitive names of plants has been a whole lot of fun. We decided to use The Plant List as our first source of species information, with IPNI as the reserve, and the RHS Search tool for garden varieties. Needless to say they don't all agree all of the time, and sometimes they contradict themselves. The Plant List accepts both *Telesonix jamesii* and *Boykinia jamesii* as valid names! Our choice for this list is *Telesonix* as we think that is the commonly used name in alpine circles.

Some genera important to rock gardeners are also in flux (aren't they always?). We have taken some arbitrary, hopefully sensible decisions on how to list them. For *Douglasia*, look at *Androsace*; for *Cortusa*, go to *Primula*, for *Symphyandra*, look at *Campanula*. On the contrary, we have decided to leave *Dodecatheon*, *Meconopsis* and *Pulsatilla* unchanged, not for any taxonomic reason, but as a convenience to rock gardeners used to the older names. Doubtless there will be more changes in future years, but perhaps it is easier to keep up slowly.....

The Plant List also tends to lump subspecies; we have tended to be more generous and leave the subspecific names in the list if the donor has provided one.

We have also wondered about 'Alba', alba and white; all three have been left in this year, but we may decide to simplify and simply use (forma) alba to cover all eventualities in future years. Any views?

Collector numbers

We have tended to list the original collector numbers on garden-collected seed from wild origin. Our view is that although recipients will receive seed which is actually "ex-" the collection number, they should be able to trace the origins of the plants they are trying to grow. So, please do add the full collector number of you have it; it can help the recipient. However, there is no point in adding "ex-JCA" or the like to the list without the full number, and we will not do this in future.

Aquilegia diseases and mouldy seed

We have been made aware of the problems in England and Korea of *Aquilegia* downy mildew. Having sought advice from RHS and RBG colleagues, we have decided to be cautious this year. Preferentially, we have used seed donated from outside the UK (no Korean donors this year!) where the disease is not present, or from Scotland rather than England. The packeters have also been asked to reject any seed with sign of mould: after all, the seed we send should be clean, dry and definitely not mouldy!!

On that basis, we would ask donors to be really careful to dry your seed before sending it to us. Moist seed in plastic envelopes has a real risk of going mouldy; and we simply cannot use that in the exchange. Please use paper or glassine envelopes in preference, or ensure all your seed is really dry if it's going into a plastic self-seal envelope.

What will we leave out of the list?

Some donations, though very few, have been left out of the list. These have included a very few serious weed and invasive species, and some distinctly un-hardy garden annuals. In general, please bear in mind that we are a club interested in hardy plants. We will list interesting trees and shrubs, herbaceous perennials and alpiners, but feel we do have to draw the line somewhere.

We have also not listed cultivars which we know have Plant Breeder's Rights attached to them. Again, this relates to very few donations. However, as seed offspring are not the same as the parent, and as we are not selling for profit, we may well be exempt from such regulations..... More to follow perhaps.
